

Thanks for Your Support!

Parker's Willing Hearts, Helpful Hands program was awarded the Regional Alzheimer's Disease Caregiver Support Initiative grant for another 5 years thanks to your support!

We are very honored to be selected again to provide support to informal caregivers of individuals living with Alzheimer's disease and other dementias as well as their loved ones living on Long Island.

We could not have achieved this success without your help and the support of our dedicated staff.

We have made several exciting changes to the program including office space in Suffolk County, several new staff positions, and new programs, as well as a newly redesigned website to be launched in the coming weeks.

We are very lucky to have such loyal and enthusiastic clients and fans of our work. Thank you!
